

Russian solar communication base station factory

Overview

Will Russian base stations speed up the development of Russian components?

Experts consider the mechanism timely, but emphasize that it will not speed up the development of Russian components. In early October 2022, it became known about the decision of the Government of the Russian Federation to support manufacturers of Russian base stations for 4G- and 5G networks.

When will Russian base stations be used?

Shadayev also explained that Russian base stations will be used initially in small settlements. Rostelecom President Mikhail Oseevsky, in turn, said that the first batches of Russian base stations are planned to be received in 2022.

Will Russian base stations be used in small settlements?

According to him, under these contracts, the Ministry of Digital Development will provide targeted financial support to manufacturers. Shadayev also explained that Russian base stations will be used initially in small settlements.

Is a circular antenna array under construction in Russia's Kaliningrad exclave?

Newsweek has contacted the Russian Defense Ministry for comment. Imagery captured by the ESA's Sentinel-2 satellites on September 5, 2025, shows a suspected circular antenna array under-construction in Russia's Kaliningrad exclave. Copernicus.

How big is Russian telecommunications equipment market?

ARPE estimates the volume of the Russian telecommunications equipment market at 250-300 rubles at the end of 2017. At the same time, the share of Russian-made solutions does not exceed 6-8% (15-24 billion rubles), although they could cover the needs of large customers by 85-90%, the letter to Medvedev says.
