

Rwanda s new outdoor power supply

Overview

The extent of grid electricity is limited and mainly concentrated near Kigali. Most of the country uses as its main energy source. Rwanda is planning to expand from 276 MW of grid power in 2022 to 556 MW in 2024 and may import some additional electricity from neighboring countries. In addition, it is installing small solar units throughout the country to ensure that households located in off-grid areas have access to electricity, or to help deal with power outag.

How many electricity plants will Rwanda have?

Peat from peat marshes in southwestern Rwanda will power two electrical plants. The first 15 MW plant is expected online in 2015 with the second, an 80 MW plant, expected in 2017. Petroleum, mainly for transportation, represented 11% of Rwanda's power in 2014.

From where does Rwanda buy power?

Rwanda currently purchases power from the Rusizi I plant (with an import capacity of 3.5 MW) and Rusizi II (with an import capacity of 12 MW), both owned by Sinelac. Rwanda buys power from the Rusizi I and Rusizi II plants in the Democratic Republic of the Congo (DRC).

How much power does Rwanda have?

The country is in the midst of a rapid expansion of its electrical grid, and many new plants are proposed or under construction. Rwanda planned to expand its grid power up to 556 MW in 2024. As of December 2022, the national installed generation capacity totaled 276.068 megawatts, with peak demand of 140.6MW.

Does Rwanda have a power grid?

Rwanda is planning to expand from 276 MW of grid power in 2022 to 556 MW in 2024 and may import some additional electricity from neighboring countries. In addition, it is installing small solar units throughout the country to ensure that households located in off-grid areas have access to electricity, or to help deal with power outages.

What is Rwanda's Energy use?

The country is in the midst of a rapid expansion of its electrical grid and many new plants are proposed or under construction. Biomass is the most important energy source utilized through firewood and agricultural waste for cooking. In 2014, this represented 85% of Rwanda's energy use.

What percentage of Rwanda's Electricity is generated by hydropower?

53% of electricity is generated by hydropower. At the end of 2018, Rwanda's grid-connected power plants supplied 221.1MW.
