

Saint Lucia produces solar photovoltaic panels

Overview

Where is St Lucia's first solar PV plant located?

On the 11 th April 2018, the St. Lucia Electricity Services Limited (LUCELEC) – the sole electric utility company on the island – completed the commissioning of the island's first utility-scale solar PV plant. The plant is rated at 3 megawatt (MW) and is located in La Tourney, Vieux Fort, just north of the Hewanorra International Airport.

How much electricity does Saint Lucia have?

Originally, a British colony, Saint Lucia's electricity service is remarkably similar to its past-masters. Saint Lucia's electricity current is 220 volts 50Hz, although a few hotels are 100 volts 60Hz. The majority of Saint Lucia's electricity outlets take the three-pin square plugs.

How many solar panels are there at Vieux Fort?

The plant consists of approximately 14,900 panels, which are distributed across three sites over a total of approximate 15 acres of land. It has a peak power rating (on the dc side) of 4 MW and is interconnected to the LUCELEC grid via two feeders emanating from the Vieux Fort substation at 11,000 volts.
