

Sales price of energy storage vehicles in Romania

Overview

Romania currently offers some of the most generous incentives in Europe for purchasing electric or plug-in hybrid-electric vehicles (xEVs). This is in stark contrast to other major EU nations such as Germ.

What is the growth rate of electric vehicles market in Romania?

In 2024, the revenue in the Electric Vehicles market in Romania is projected to reach US\$1,320.0m. It is expected to show an annual growth rate (CAGR 2024-2029) of 16.81%, resulting in a projected market volume of US\$2,871.0m by 2029. By 2029, the unit sales of Electric Vehicles market in Romania are expected to reach 41.94k vehicles.

Are electric cars still popular in Romania?

There was greater choice in terms of fully electric vehicles, but the plug-in hybrid market remains largely unchanged. The Dacia Spring remained the top-selling electric vehicle in Romania with approximately 60% of all new EV registrations.

Is e-mobility a good investment in Romania?

As Romania's e-mobility market moves closer to maturity, a variety of organizations across the value chain are rushing to seize the accompanying opportunities. Charging infrastructure is approaching full commercialization and the choice of locations yet to be monetized is diminishing.

How many Xev & PHEV charging stations are there in Romania?

However, this still lies some way behind many Western European countries: in major European markets, xEVs & PHEVs accounted for 21% of new registrations. The number of charging locations in Romania continues to increase by approximately 300 units each year, now totaling ca. 1,350. But only a quarter of these have two or more stations.

How many charging stations are there in Romania?

The number of charging locations in Romania continues to increase by

approximately 300 units each year, now totaling ca. 1,350. But only a quarter of these have two or more stations. The government aims to fund the construction of 6,500 stations by 2026.

Does Romania offer Xev incentives?

Romania currently offers some of the most generous incentives in Europe for purchasing electric or plug-in hybrid-electric vehicles (xEVs). This is in stark contrast to other major EU nations such as Germany, France, Sweden, and the Netherlands, which are gradually reducing or removing their own incentives.
