

# Saudi Arabia recommends solar power generation for home use

#### **Overview**

Will Saudi Arabia be able to produce 40 gigawatts of solar energy?

The ambitious target of Saudi Arabia's National Renewable Energy Program sees the Kingdom aiming for a solar energy capacity of 40 gigawatts by 2030, promising significant opportunities for the market in the years to come.

Does Canva Saudi Arabia have solar power?

Credit: Canva Saudi Arabia has been making remarkable strides in renewable energy, with a significant focus on solar power as part of its Vision 2030 initiative. The Kingdom aims to generate 50% of its electricity from renewable sources by the end of the decade, with solar energy leading the charge.

Does Saudi Arabia have solar energy?

As for Gan, he indicated that given its geographical location, Saudi Arabia has an abundance of solar energy, surpassing that of many developed countries – an evident advantage in terms of available sunlight as an energy source. "However, high temperatures present a significant challenge, leading to overheating in semiconductor solar cells.

Is solar energy a sustainable model for Saudi Arabia?

"Saudi Arabia is leveraging world-class innovations in solar energy to not only produce electricity but to create a sustainable model for the entire region," El-Borai said. "Companies like Mirai Solar are also making strides with multifunctional solar panels that harness diffused sunlight while providing variable shading.

Why is Saudi Arabia embracing solar power?

Roula Khalaf, Editor of the FT, selects her favourite stories in this weekly newsletter. Saudi Arabia's big businesses are embracing solar power as they seek to save on energy costs after the government eliminated electricity subsidies in the world's largest oil exporter.

#### How much energy does Saudi Arabia need?

"Saudi Arabia has a yearly energy demand of about 400 terawatt hours," Michael Salvador, co-founder and CEO of Mirai Solar and technology lead at the King Abdullah University of Science and Technology's Solar Center, told Arab News. "To meet this need solely through renewables, approximately 200 GW of installations would be required."
