

Solar system home costs in Romania

Overview

How much is the Solar Rebate program in Romania?

In 2022, the Ministry of Environment allocated RON 280 million for the rebate program. Romania's net-metering regulations, which apply to all systems up to 100 kW in size, include fiscal incentives for owners of PV systems with capacities of up to 27 kW.

What are the different solar energy schemes in Romania?

Some of the most notable schemes include: Feed-in-tariff (FIT) scheme: Under this scheme, renewable energy producers in Romania, including solar energy producers, are guaranteed a fixed price for their electricity for 15 years. The FIT rates for solar energy are revised every year, and they depend on the type and size of the solar project.

Is Romania a solar market?

According to the International Renewable Energy Agency (IRENA), Romania is now considered one of the top ten solar markets in Europe, with a total installed solar photovoltaic capacity of 1,545 MW as of the end of 2023. One primary driver was the EU Modernization Fund.

How many solar panels are installed in Romania in 2021?

According to the latest statistics from the International Renewable Energy Agency (IRENA), Romania had 1,396 MW of solar installed at the end of 2021. How much will Romania spend on a Green PV home?

Romanian Prime Minister Nicolae Ciucă says the government will allocate RON 3 billion (\$666.2 million) this year for the Casa Verde Fotovoltaice (green PV home) scheme, in order to support residential solar installations under the

national net-metering regime.

How many solar rebates does Romania have in 2023?

Further to this, the government has assigned \$666 million for solar rebates in 2023 under a PV systems scheme. Overall, Romania has made significant strides towards the development of its solar energy sector, with a growing number of solar projects and investments flowing into the country.
