

## Tajikistan New Energy Storage Industrial Park Project

#### **Overview**

How can Tajikistan improve its energy system resilience?

Tajikistan seeks to enhance its energy system resilience by reconnecting to the United Energy System of Central Asia. This effort is supported by large infrastructure projects of common interests, such as CASA-1000 and the Rogun Hydropower Plant Project.

Can Tajikistan's solar power be harnessed to meet energy-policy goals?

In addition to hydropower, Tajikistan's significant solar power potential could be harnessed to meet several energy-policy goals simultaneously, and the government has recently set a target for renewable energy to provide 10% of generating capacity by 2030.

Does Tajikistan have a mining industry?

Despite its vast mineral resources, many are not mined or are mined primitively. However, as future demand for critical raw materials increases amidst developments in the global energy transition, Tajikistan's mining industry holds much untapped potential. Coal currently significantly contributes to Tajikistan's energy mix.

Why should Tajikistan invest in hydropower?

In addition to its vast hydropower export potential, Tajikistan's hydrogen production potential and reserves of critical raw materials, such as manganese, lead, aluminum and zinc, should be leveraged to enable Tajikistan's energy transition and to generate novel export revenue streams.

What is Tajikistan's development strategy?

The Tajikistan Development strategy by 2030 aims to scale up its electricity capacity from 5.1 GW in 2021 to 10 GW to enable 10 TWh of annual electricity export.

Will Tajikistan scale up its electricity capacity by 2030?

The Tajikistan Development Strategy by 2030 aims to scale up its electricity capacity from 5.1 GW in 2021 to 10 GW, to enable 10 TWh of annual electricity export.
