

# The remaining photovoltaic panels of the project

#### **Overview**

These efforts focus on recycling research and analysis, assessing the life cycle of PV modules, improving environmental safety and health in PV manufacturing, and publishing reports on end-of-life managemen.

#### The remaining photovoltaic panels of the project

#### What happens when a solar facility is decommissioned?

Solar panels can operate past thirty years - albeit at lower eficiency - the owner can keep the panels, or "repower" the site by upgrading the panels with more eficient solar technology.
