

# There are several types of battery cabinet factories in South Africa

#### **Overview**

How does battery storage work in South Africa?

Battery storage systems offer a solution by storing surplus energy generated during peak production periods and releasing it when demand is high, ensuring a consistent and reliable power supply. The South African government has acknowledged the potential of battery storage and has set ambitious targets for its deployment.

How can South Africa develop a sustainable and competitive battery storage industry?

Addressing this gap is crucial for the development of a sustainable and competitive domestic industry. Competition: The global battery storage industry is already dominated by established players, particularly in Asian countries. South Africa needs to develop a strong value proposition to attract investments and compete effectively.

What is the skills gap in battery storage in South Africa?

Skills gap: The advanced technologies involved in battery storage require specialised skills and expertise which are currently scarce in South Africa. Addressing this gap is crucial for the development of a sustainable and competitive domestic industry.

Why are batteries not made in South Africa?

That is because there is no plant producing the cells that form the basic building blocks of batteries. These cells are made from raw minerals — many of which are not mined or readily available in South Africa — and are often exported from other African countries to China or the US.

How can South Africa tackle battery storage challenges?

To overcome these challenges and unlock the potential within the battery storage sector, South Africa needs a multi-pronged approach that must

include: investment in refining and processing infrastructure; focusing on existing strengths; fostering collaboration; developing attractive investment incentives; and embracing innovation.

Who makes a battery in Cape Town?

The second-largest battery assembly plant is owned Balancell, which recently upgraded its production facility in Cape Town to support up to 1GWh output per year. Balancell's biggest customer is Toyota Material Handling, while other well-known customers include Cape Fruit, Clicks Nestle, Shoprite, Spar, and Pick n Pay.
