

# Township container power generation installation station

#### **Overview**

The whole system is plug-and-play, easy to be transported, installed and maintained. It is an one-stop integration system and consist of battery module, PCS, PV controler (MPPT) (optional), control sys.

What is a containerized energy storage system?

A Containerized Energy-Storage System, or CESS, is an innovative energy storage solution packaged within a modular, transportable container. It serves as a rechargeable battery system capable of storing large amounts of energy generated from renewable sources like wind or solar power, as well as from the grid during low-demand periods.

What is a containerized mobile substation?

Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas with high pollution, high humidity, extreme temperatures or sand storms. Containers are easy to transport and fast to install, by reducing foundation works as well as installation and commissioning effort on site.

Can I add more container units to my energy storage system?

Each container unit is a self-contained energy storage system, but they can be combined to increase capacity. This means that as your energy demands grow, you can incrementally expand your CESS by adding more container units, offering a scalable solution that grows with your needs.

What is a twin power container?

The Twin Power container solution is a container that combines two engine/alternator assemblies with/ without CHP in a 40ft container, making it perfect for applications that require variable or continuous power. Because you have two generators on a single platform, you have the flexibility you need to meet a 100% load or even a smaller load.

What is the scope of supply for containerized Mobile substations?

The scope of supply covers the complete assembly which may include: Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas of high pollution, and humidity.

Where can a portable power container be used?

The MOBIPOWER portable power container can be used virtually anywhere on the planet and will produce and store all the power you will need.
