

# Türkiye lithium energy storage power supply purchase price

#### **Overview**

The cost for lithium-ion batteries in Turkey rounds from \$200 to \$500 per kilowatt-hour, although fluctuations may occur due to market conditions and availability. The convenience of lithium-ion batteries allows for modular designs, supporting various scales of installation. Will Turkey raise import duties for lithium iron phosphate (LFP) batteries?

Image: Polat Enerji The government of Turkey, currently processing applications for large-scale energy storage facilities at renewable energy plants, will raise import duties for lithium iron phosphate (LFP) battery products.

Are Turkish energy storage systems a good investment?

Speaking with Energy-Storage.news yesterday, Can Tokcan, managing partner at Turkish energy storage system integrator and manufacturer iNOVAT, said the developments were "very positive for the industry," although it remains to be seen "how much of that [near 30GW] will be realised and in what time span".

Will the government levy tariffs on LFP batteries?

At the same time, Tokcan said that perhaps equally, or of even more immediate relevance to the market's early stage development is the government's recent announcement that it will levy duties onto imported LFP battery products. The 30% tariffs will apply to not only cells, but also battery modules and complete systems.
