

Türkiye s environmentally friendly solar energy system application

Overview

Planar and vacuum solar collectors, solar pools, solar chimneys, water purification systems, solar architecture, product drying and greenhouse heating systems and applications such as solar cooking are applications aimed at obtaining low temperatures from solar energy.

Türkiye s environmentally friendly solar energy system application

EFFECTIVE UTILIZATION OF SOLAR ENERGY IN ...

The city of Mus was chosen as an example for the analysis of solar energy use in agricultural irrigation, since its agriculture-based economy and solar energy potential are above the ...
