

Ukraine 5G communication base station wind power

Overview

How will 5G work in Ukraine?

For the introduction of 5G, the Cabinet of Ministers approved a plan for the use of the radio frequency resource of Ukraine until 2025. It is complemented by the new basic LTE/LAA, eLTE-U and PMP standards. These changes will allow users to get more stable and faster speeds when watching videos and listening to music.

Is Russia stalling Ukraine's 5G plans?

While many operators across Europe have focused on launching 5G networks, the same can't be said for Ukraine. Speaking to DCD, Stanislav Prybytko, director general of the directorate for mobile broadband for Ukraine's Ministry of Digital Transformation, explains that the war with Russia has stalled the country's 5G goals.

Is 5G a priority for digital transformation in Ukraine?

The Cabinet of Ministers identified the development of high-speed communication 4G and 5G as one of the priorities of digital transformation. In November 2020, Ukraine began to free up frequencies for fifth-generation (5G) networks. The corresponding plan was approved by the Ministry of Digital Transformation of Ukraine.

Will Latvia support Ukraine's 5G network?

Support for the development of its 5G network is also coming from Latvia. During the 5G Techritory event in October, which was held in Riga, Latvia, Ukraine signed an MoU with the Latvia government, which will see the latter provide support to rebuild Ukraine's telecoms infrastructure.

Will Ukraine tender 5G spectrum assignment in 2020?

As of August 2020, no announcement has been made regarding the tendering process for the 5G spectrum assignment in Ukraine.

What is the plan for LTE radio in Ukraine?

The corresponding plan was approved by the Ministry of Digital Transformation of Ukraine. The document involves the release of radio frequency bands, the ranges of which are occupied by television, for the introduction of LTE radio technology in the bands 790-862 MHz, 694-790 MHz, on which Ukrainian television operates.

Ukraine 5G communication base station wind power

Cooperative game-based solution for power system dynamic ...

The uncertainty of renewable energy necessitates reliable demand response (DR) resources for power system auxiliary regulation. Meanwhile, the widespread deployment of ...
