

What are the built-in batteries of lithium battery packs

Overview

Lithium-ion battery packs are essential power sources used in medical equipment, drones, robots, and countless other devices. These packs are made of multiple Li-ion cells (like 18650 or 21700) connected in series and/or parallel to provide specific voltages and capacities.

What are the built-in batteries of lithium battery packs

[Understanding Li-Ion Battery Packs: A Complete Guide](#)

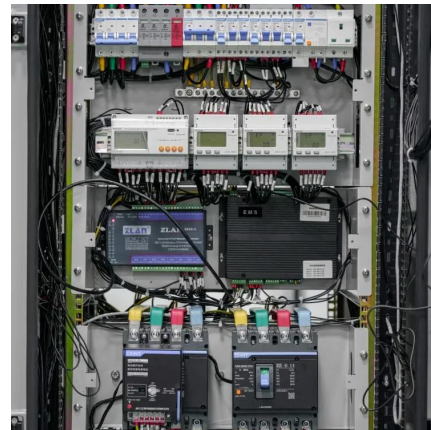

To start, let's clarify what a Li-ion battery pack really is. Essentially, it's a set of lithium-ion cells working together to provide a stable power source. Each cell is like a tiny ...
