

What are the parameters of outdoor power supply in Zimbabwe

Overview

Who owns electricity in Zimbabwe?

Generation, transmission and distribution of electricity in Zimbabwe is the sole responsibility of the state owned Zimbabwe Electricity Supply Authority, (ZESA). ZESA owns four thermal power stations, of which the biggest is the coal-fired Hwange Power Station in the west of the country capable of producing 920 MW of power.

How much electricity does Zimbabwe produce?

About 50% of Zimbabwe's electricity demand is driven by the mining and other heavy industries. Despite having a vast renewable energy potential, 18 IPPs produce just about 136 MW of power for own consumption or for trading, out of which 36 MW is generated from Renewable sources.

What are Zimbabwe's energy projects?

The Government of Zimbabwe has prioritised energy projects as one of the key enablers to economic growth and development. The prioritised projects include new plants and the optimization of existing plants and are expected to add additional power to the grid as follows:.

How many power plants are there in Zimbabwe?

Despite having a vast renewable energy potential, 18 IPPs produce just about 136 MW of power for own consumption or for trading, out of which 36 MW is generated from Renewable sources. The rest of their production is dominated by government owned power entities. Zimbabwe Power company (ZPC) operates and manages five power stations.

How much power does Zimbabwe import?

Currently power imports stand at around 400 MW. Industry and Commerce have struggled partly due to acute power shortages being experienced in the country. The Government of Zimbabwe has prioritised energy projects as one

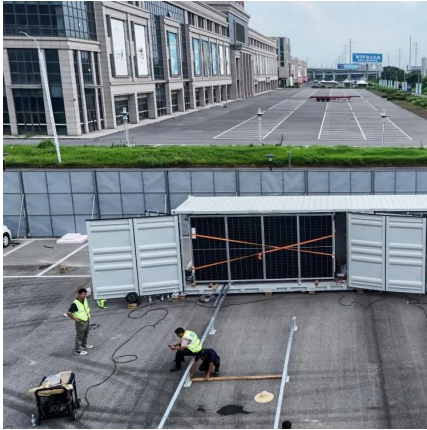

of the key enablers to economic growth and development.

What is sustainable economic growth in Zimbabwe?

Sustainable economic growth is anchored on affordable, reliable and stable supply of energy to industry and households. Zimbabwe is currently facing power shortages with estimated reliable generation of about 1049 MW against an estimated suppressed peak demand of 2200MW. Currently power imports stand at around 400 MW.
