

Yemen Energy Storage Power Station Planning

Overview

Why is the energy sector important in Yemen?

The Yemeni government is committed to economic reform, hoping that it will lead to further economic stability and recovery in the upcoming future. The energy sector is one of the key elements of these improvements (The Republic of Yemen 2013). Besides, Yemen's power industry is currently witnessing the worst crisis in the nation's history.

How does Yemen generate electricity?

Yemen will generate annual revenue from carbon trading and the sale of unused fossil fuels (such as oil and its by-products) and natural gas by relying on renewable energy to generate electricity. The total generating capacity of wind and solar energy is 18600 + 34,286 = 52886 MW (52.886GW).

What is the main source of energy in Yemen?

As mentioned earlier, according to the International Energy Agency, in 2000, oil made up 98.4% of the total primary energy supply in Yemen, while in 2017, oil made up about 76% of the total primary energy supply, and natural gas about 16%. Oil and gas are the largest suppliers of fuel for power plants (Sufian 2019).

What are the major energy problems in Yemen?

Yemen is facing serious energy problems, such as circulation obligations, line losses, obsolete transmission lines, and electricity theft among the rural population (71%), resulting in 8–10 h of power shortage.

How much wind and solar power does Yemen need?

Therefore, the remaining power of wind and solar energy is about 33.59GW and according to case two, the total power required which is 9.648GW needed by the Yemeni population in 2030 only accounted for about 18% of the total available power of 52.886GW of wind and solar power, and the remaining

Is there a new power plant in Yemen?

In August 2013, Yemen began construction of a new 400 MW (Ma'rib II) gasfired power generation facility, which is scheduled to start operation at the end of 2014, but was delayed to the recent years due to the recent security turmoil (Economic Consulting Associates Limited 2009; Arab Union of Electricity 2015; U.S. 2017; Rawea and Urooj 2018).
